

Please do not do away with the rules regarding our media protections. We really need a diverse selection of t.v. and radio stations so that everyone will have the chance to be heard. A monopoly would not be a wise choice. We the people should be able to hear different view points on news and issues instead of hearing the same view points from only a few different sources. America is a very diverse society and we deserve to hear diverse opinions. Taking away the media rules or loosening them will just give these large media companies the opportunity to take over the media and the little people will not have the chance to be heard. That will affect our right to freedom of speech.
